Multi-Sector | Factsheet as of 28 February 2026

This is a marketing communication. Please refer to the offering documents before making any final investment decisions.

Risk Considerations

INVESTMENT INVOLVES RISKS. The value of the Fund can be volatile and investors may not get back the amount originally invested. Past performance is not indicative of future results.

- The Fund is a sub-fund of Franklin Templeton Global Funds plc, an open-ended umbrella investment company constituted in Ireland. The Fund seeks to maximise total return through income and capital appreciation by investing at least 75% of its net asset value in debt securities that are listed or traded on regulated markets located in developed markets and emerging market countries, denominated in US dollars and rated at the time of purchase at least BBB by S&P, or comparable quality.
- Investors will be exposed to debt securities risk, risk of government securities, rated and unrated securities, interest rate risk, credit risk, liquidity risk, concentration risk, custody and settlement risk, inflation-protected securities risk, US markets risk, emerging markets risk, currency risk and investment risk.
- The Fund may invest in mortgage-backed securities and asset-backed securities, which may give rise to higher liquidity, credit, counterparty and interest rate risks.
- The Fund may use certain types of financial derivative instruments ("FDIs") extensively for investment and other non-hedging purposes, which may involve a higher degree of risk such as counterparty, volatility and leverage, liquidity and valuation risks. The Fund may suffer a total or significant loss arising from the extensive use of FDIs.
- The Fund is a complex product with net derivative exposure that may exceed 50% but up to 100% of the Fund's net asset value. It is not principal protected and in the worst case you may suffer a total loss of your investment. The Fund is authorized by the Securities and Futures Commission ("SFC") and is available to the public in Hong Kong. There is no secondary market for the Fund and SFC's authorization does not imply its official recommendation, endorsement nor does it guarantee the commercial merits of the Fund or its performance. Investors should exercise caution in relation to the Fund.
- The Fund may invest in debt instruments that have contingent write down or loss absorption features, these instruments involve risks which may potentially lead to losses to the Fund.
- The directors of Franklin Templeton Global Funds plc may at their discretion pay dividends out of capital of a Distributing Plus Share Class. The payment of dividends out of capital effectively amounts to a return or withdrawal of an investor's original capital investment or of capital gains attributable to that original investment. Such distribution will result in a corresponding immediate decrease in the Net Asset Value per share of these Share Classes.
- Investors should not invest based on this marketing material alone. Offering documents should be read for further details, including the risk factors. Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you.

Past performance does not predict future returns.

Glossary

Comparator: Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment. **Average Credit Quality:** The average credit quality reflects the holdings of the underlying issues, based on the size of each holding and ratings assigned to each based on rating agency assessments of its creditworthiness. **Average Life:** An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings. **Effective Duration** is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change. Duration measures the sensitivity of price (the value of principal) of a fixed-income investment to a change in interest rates. The higher the duration number, the more sensitive a fixed-income investment will be to interest rate changes. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return. **Charges:** For a comprehensive list of the types of costs deducted from fund assets, see the prospectus and Product Key Facts.

Portfolio Data Information

Holdings are provided for information purposes only and should not be deemed a recommendation to buy or sell the securities mentioned.

Credit Quality is a measure of a bond issuer's ability to repay interest and principal in a timely manner. The credit ratings shown are based on each portfolio security's rating as provided by S&P Global Ratings, Moody's Investors Service and/or Fitch Ratings, Inc. and typically range from AAA (highest) to D (lowest), or an equivalent and/or similar rating. For this purpose, if two or more of the agencies have assigned differing ratings to a security, the highest rating is used. Securities that are unrated by all three agencies are reflected as such. The credit quality of the investments in the portfolio does not apply to the stability or safety of the portfolio. The methodology used for the calculation of credit quality ratings displayed may differ from the methodology for monitoring investment limits, if applicable. **Please note, the portfolio itself has not been rated by an independent rating agency.**
